

WEATHERMATE® – 38YCC

HEAT PUMP

EFFICIENT PERFORMANCE AT 10.0 SEER AND 7.0 HSPF

UNWIND IN QUIET, ECONOMICAL COMFORT WITH CARRIER'S 38YCC HEAT PUMP.

COMFORTABLE SAVINGS

Carrier's line of WeatherMate® heat pumps provide money-saving, custom made indoor weather. Delivering up to 11.5 SEER (Seasonal Energy Efficiency Ratio) and 7.5 HSPF (Heating Seasonal Performance Factor), the 38YCC offers energy savings and enhanced control of your indoor weather. The most affordable heat pump in our WeatherMate series, the 38YCC delivers year-round heating and cooling with trusted Carrier reliability.

QUALITY

Top-quality products like the 38YCC heat pump are what make Carrier the leader in the indoor weather industry.

The outdoor coil transfers heat with superior efficiency so you can enjoy affordable, custom made indoor weather. Our unique discharge muffler allows you to relax in quiet comfort by minimizing vibrational noise caused by pulsations in the refrigerant line. And, as the seasons change, you can count on the reversing valve to reliably switch heat pump operation between heating and cooling modes.

RELIABILITY

You can count on Carrier's 38YCC heat pump for years of dependable indoor weather. To ensure the performance and reliability of our products, each unit undergoes the most stringent product testing in the industry. Beginning with product development, we confirm that our designs are of the highest quality before we go into production. Each unit is tested again on the assembly line as our products are manufactured. This rigorous testing continues in field test sites to ensure that you'll enjoy years of reliable, indoor comfort.

HIGH-PERFORMANCE TECHNOLOGY

- 1 Efficient operation** is the result of our exclusive aerodynamic top designed to allow easier, less turbulent airflow through the unit.
- 2 Added efficiency and durability** of the compressor results in smoother, more consistent operation. The compressor is the single most important component in a heat pump system.
- 3 Responsive indoor weather** is provided year round through the smooth, reliable operation of the reversing valve. This component switches the heat pump between heating and cooling operation.
- 4 Reduced vibrational noise** is assured with our refrigerant line discharge muffler.
- 5 Long-lasting good looks** can be attributed to our WeatherArmor™ III cabinet and base pan. Galvanized steel finish with a baked-on powder coating provides corrosion and scratch resistance. Base pan is designed for superior drainage of water and small debris.

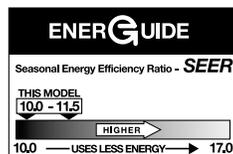

WARRANTY

As the industry's quality leader, Carrier backs its products in writing. The 38YCC is protected by a **five-year parts limited warranty**. Ask your Carrier dealer about extended warranty programs.
